eTG Complete

eTG Complete includes all Therapeutic Guidelines topics integrated in a single searchable electronic product giving immediate access to over 3,000 clinical topics via a handcrafted index of more than 25,000 terms. Also included are links to key references, full text articles and relevant Cochrane Library Reviews, as well as other independent information including Australian Prescriber (including Medicines Safety Update), NPS RADAR, and NPS News. Updates are issued three times per year (March, July and November).

Access

Select ‘E’ for eTG Complete from the alphabetical list under E-resources & databases on the ANU Library homepage http://anulib.anu.edu.au

Searching

Simple keyword searching is available, browse by therapeutic guideline as well as a browseable drug index.
Keyword searching searches across therapeutic guides and provides links to topics in the results.

Searching within guidelines is also available.
